This document is a quick reference to additional information that we, as the manufacturer, must provide you, as the installer, as per the Electric Vehicles (Smart Charge Points) Regulations 2021.

These include:

- Statement of Compliance
- Technical File
- Sample Config File
 - This includes configuration for regulated features such as randomised delay, default off-peak charging schedule, session logs, etc

To access the above resources, please visit:

www.loxone.com/enen/kb/wallbox-evscp/

We have included an energy meter in the box with this product as per the Electric Vehicles (Smart Charge Points) Regulations 2021. The warranty for this device is covered by the manufacturer and not Loxone. Loxone can handle the RMA process on your behalf if there is a need to return it.

This product is also packaged with a product insert leaflet (also available as a PDF on the Loxone Webshop), including installation information and links to the respective documentation pages.

For any supporting information, please contact support@loxone.com

The above resources only pertain to the Electric Vehicles (Smart Charge Points) Regulations 2021 and are therefore separate from any other regulations for the installation laid out in, for example, Amendment 1 (2020) to BS 7671:2018 + A1:2020. Such and any additional considerations need to be factored in independently by the installer.
